What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Fund is to deliver stable and consistent growth in capital and income over the medium to long term.

Investment policies The Goodbody Dividend Income Cautious Fund ("the Fund") invests primarily in a diversified portfolio of predominantly dividend paying global equity securities which generate stable income. In order for the Fund to deliver stable and consistent growth consistent with its objective, the investment manager may reduce exposure to equities and increase exposure to money market instruments and fixed income securities, based on its view of the outlook for global equity markets.

The Fund may have up to 60% of its Net Asset Value invested in equities.

The Fund may also invest in options (a contract which gives the right, but not the obligation, to buy/sell an underlying asset at a specified price on or before a specified date) and futures (a contract to buy/sell an asset for a price agreed today with delivery and payment occurring at a future date). The investment manager will seek to generate additional income for the Fund by writing options on some of the underlying equity holdings in the Fund. The investment manager will aim to reduce the volatility of the overall Fund by purchasing downside protection via index options on some of the major global equity indices, for example, S&P 500, EuroStoxx 50 and Topix.

The Fund may invest in money market instruments such as treasury bills (rated at least investment grade), cash and deposits and fixed income securities.

The Fund may invest in exchange traded funds (ETFs) (a marketable security that tracks an index, a commodity, bonds, or a basket of assets like an index fund). Any investment in such instruments will provide indirect exposure to global equity markets. Investment in ETFs will be limited to 10% of the Net Assets of the Fund.

The Fund may invest in fixed income securities including government and corporate bonds. Such instruments will be rated investment grade or higher by industry recognised ratings agencies. The Fund may also invest in Global and American depositary receipts for the purpose of gaining exposure to the underlying equity securities. The Fund may invest up to a maximum of 20% of its Net Asset Value in emerging markets.

Please refer to the Prospectus and Supplement for more detailed information.

Benchmark The Fund is actively managed. The investment manager has full discretion over the composition of its portfolio subject to the stated

investment objectives and policies and it does not track or benchmark its performance against an index.

Redemption and Dealing On demand, you can buy and sell Shares in the Fund on any Business Day.

Distribution Policy All income and gains generated by the Class B EUR Accumulation Shares will be reinvested. No dividends will be paid for the Accumulation Classes.

Launch date The Fund launched on 18/12/2015. The share class launched on 18/12/2015.

Fund Currency The share class is denominated in EUR.

Switching Investors may switch shares in the Fund for shares in other sub-funds of Goodbody Funds ICAV, provided that they satisfy the criteria applicable to investments in the other sub-fund(s). Further information on switching is contained in the prospectus.

Asset Segregation The Fund is a sub-fund of Goodbody Funds ICAV, an open-ended umbrella type Irish collective asset-managed vehicle with variable capital with segregated liability between its sub-funds and is established as an Undertaking for Collective Investment in Transferable Securities (UCITS).

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-low level of risk of loss to their original capital in order to get a higher potential return.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The PRIIP manufacturer, Waystone Management Company (IE) Limited, is not entitled to terminate the product unilaterally.

Practical information

Depositary The Fund's assets are held through its Depositary, which is CACEIS Bank Ireland Branch and are segregated from the assets of other sub-funds of Goodbody Funds ICAV.

Further information Further information about the Fund (including the current prospectus and most recent financial statements) and the different Classes of Shares are available at the registered office of the ICAV. The net asset value per share for each share class of the Fund is available at www.goodbody.ie.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 December 2021 and 31 October 2024.

Moderate: this type of scenario occurred for an investment between 30 November 2017 and 30 November 2022.

Favourable: this type of scenario occurred for an investment between 29 December 2018 and 29 December 2023.

What happens if Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should the Fund default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the Fund to pay you.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at www.goodbody.ie.

	If you exit after 1 year	If you exit after 5 years
Total Costs	85 EUR	538 EUR
Annual cost impact*	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.3% before costs and 4.4% after costs.
